Information Resources for Psychology and Psychiatry

Carmen Bou-Crick, MSLS, AHIP
Librarian Associate Professor
University of Miami Libraries
Head, Reference & Education, Calder Library
July 6, 2017
Objectives

• Upon completion of this class, you will be able to identify, describe, and use:

1. **uSearch**—including e-Journals, e-Books, and other library resources

2. **Clinical Decision-Support Tools**—including PsychiatryOnline, Access Medicine, ClinicalKey, Isabel, DynaMed Plus, and UpToDate

3. **Bibliographic Databases**—including PsycINFO, PubMed, Health and Psychosocial Instruments, and Mental Measurements Yearbook/Tests in Print

DynaMed Plus

Now Available at Calder Library

Why DynaMed Plus?

Access Everywhere:
DynaMed Plus can be accessed anywhere - On-site, remotely and mobile app.

Ease of Navigation:
Updates can be easily filtered to view by specialty area & practice-changing updates.

Designed for Point-of-Care Use:
Content is organized by disease state - all information on one topic.

Highest Quality Drug & Lab Content:
From Micromedex® DRUGDEX and Lab Recommendations

## Depression and Anxiety in the Elderly

For patients with **depression** who have insomnia and **anxiety**, a sedating antidepressant such as mirtazapine can be helpful. In the **elderly**, trazodone, beginning at 25 mg at bedtime, is an effective sleep aid at doses lower than those which cause its antidepressant effect. Zolpidem may have a decreased...  

### Mental Disorders > Clinical Manifestations

... minimization of distress. The presence of **anxiety**, panic, or agitation significantly increases near-term suicidal risk. Approximately 4–5% of all **depressed** patients will commit suicide; most will have sought help from physicians within 1 month of their deaths. In some **depressed** patients, the mood disorder...
effective treatment of major psychiatric illnesses such as major depression and panic disorder requires patient access to informed health care practitioners, accurate diagnosis, and affordable, safe, and effective treatments. Factors hampering psychiatric treatment include patient reluctance, social stigma, managed care restrictions, and a dearth of psychiatrists and psychologists, particularly in rural areas. Although the safety and efficacy of anxiolytic and antidepressant treatment in patients with cardiovascular disease have not been extensively established in randomized clinical trials, these agents are prescribed...

Key points

- Depression is common and may be chronic, recurrent, and potentially life threatening but can be managed through early identification and active treatment
- Symptoms in children and adolescents are similar to those in adults, but the developmental stage influences symptom expression
- The presence of at least five of the following indicates depression:
  - Changes in appetite or weight, sleep, or psychomotor activity
  - Decreased energy

Suicide deaths
Summary
Suicidal ideation and behavior in adults

INTRODUCTION — Approximately 37,000 people in the United States [1] and one million worldwide die by suicide [2].

Primary care providers may be in a unique position due to their frequency of interaction with suicidal patients. Of 49.4% of the study, compared with one-third who had contact with mental health services before their suicide (45 versus 20 percent).

Despite this, there are no data to show that screening for suicide in primary care reduces mortality. Addition sensitivity or specificity [4,5].

Nevertheless, the fact that primary care clinicians see a large portion of the patients who subsequently commit suicide, and assessment of suicidality in patients being treated for depression are appropriate in the primary care setting. This topic reviews risk factors for suicide, and the evaluation, initial management, and appropriate follow-up antidepressants on suicide risk in adults.

Time-lapse mapping of cortical changes in schizophrenia with different treatments.

Abstract

Using time-lapse maps, we visualized the dynamics of schizophrenia progression, revealing spreading cortical changes that depend on the type of antipsychotic treatment. Dynamic, 4-dimensional models of disease progression were created from 4 repeated high-resolution brain magnetic resonance imaging scans of 36 first-episode schizophrenia patients (30 men/6 women; mean age: 24.2 ± 5.1 SD years) randomized to haloperidol (HAL) (n = 15) or olanzapine (OLZ) treatment (n = 21), imaged at baseline, 3.6, and 12 months (144 scans). Based on surface-based cortical models and point-point measures of gray matter volume, we generated time-lapse maps for each treatment. Disease trajectories differed for atypical versus typical neuroleptic drugs. A rapidly advancing parieto-to-frontal deficit trajectory, in HAL-treated patients, mirrored normal cortical maturation but greatly intensified. The disease trajectory advanced even after symptom normalization, involving the frontal cortex within 12 months with HAL treatment. Areas with fastest tissue loss shifted anteriorly in the first year of psychosis. This trajectory was not seen with OLZ. Whether this association reflects either reduced neurotoxicity or neuroprotection cannot be addressed with neuroimaging; changes may relate to glial rather than neural components. These maps revise current models of schizophrenia progression; due to power limitations, the findings require confirmation in a sample large enough to model group × time interactions.

Abstract

Two self-rated questionnaires, SELFCARE (D) and Hospital Anxiety Depression (HAD) Scale, were compared in relation to their efficacy in detecting depression in 72 elderly patients attending general practitioners at a health centre in Liverpool, England. The sensitivity, specificity and overall misclassification rates of both the scales were assessed against a diagnosis arrived at by using a standardized interview schedule, Geriatric Mental State (community version), and a computerized diagnostic scheme, AGECAT. In this preliminary study, SELFCARE (D) was found to be superior to HAD as a screening instrument for depression in the elderly population in primary care. © 1997 by John Wiley & Sons, Ltd.

Calder Library Video Training Sessions

No time to attend a training session? Save time and effort by viewing Calder Library created online training tutorials:

PUBMED

PubMed provides access to MEDLINE, the National Library of Medicine’s database of citations and abstracts in the fields of medicine, nursing, health care systems sciences, and other biomedical topics.
For REMOTE ACCESS (Register at Circulation Desk)

Remote Access

Remote access to the Louis Calder Memorial Library’s Licensed Resources (E-journals, E-books and Databases) is restricted to faculty, staff and students at the University of Miami Miller School of Medicine / University of Miami Health System (UMMSM/UMH) and Jackson Health System (JHS) Personnel.

Eligible off-campus users (UMMSM/UMH and JHS) can access resources in a variety of ways depending on their affiliation.

EZ-Proxy Access
Medical Library users who are on campus will have automatic access to resources. Remote access will continue to be provided with Single Sign-On Authentication (CaneID) for UM students and employees.

Remote access for non resident JMH staff will require registering for a restricted-use CaneID/C-Number.

Follow these steps:
1. Register for a CaneID/ C-Number
2. Register in person at Calder Library with photo ID and provide your C# to library staff.
Detailed proxy logon information is available here. It may take up to 2 business days for your account to be activated. For further help, you can contact library staff at 305-243-6403.

Remote Access information is available at the Calder Library website: http://calder.med.miami.edu
Come visit Calder Library soon!

Please use our Resources and Services:

- **Databases and Online Resources** for finding the information that you need when you need it
- **Reference Librarians On Call**: M-F; 9-5 (305-243-6648, in person at Calder or by email: reference@med.Miami.edu
- **Individual & Group Training** to make you proficient in using our resources
- **Library Access:**
  - MON-THU: 7:30 AM-Midnight
  - FRI: 7:30 AM-8:00 PM
  - SAT: 8:00 AM-8:00 PM
  - SUN: Noon-Midnight
- **Computers on three floors, Study Rooms, Quiet Areas, Relaxing chairs, & more...**
- **InterLibrary Loans (ILL)**
- **Remote Access**
- **Poster Preparation** at BioMed
We hope you have a wonderful training at UM/JMH!
