JMH
New House Staff
Orientation
2018
Educational Objectives:

At the end of this activity, participants will be able to:

1. Use Calder Library website to find relevant resources and library services.
2. Register CaneID for remote access to resources.
3. Explore clinical decision support databases.
4. Search PubMed Clinical Queries to find treatments that work.
5. Find electronic resources quickly with uSearch.
6. Utilize authoritative clinical information sources in the practice of medicine to improve patient care and outcomes.
Welcome, JMH House Staff. We bring you the Calder Library...
Normal Operating Hours

Mondays-Thursdays: 7:30 a.m. - Midnight
Fridays: 7:30 a.m. - 10:00 p.m.
Saturdays: 10:00 a.m. - 10:00 p.m.
Sundays: 10:00 a.m. - 10:00 p.m.

Holidays
2018
New Year’s Day: Closed Monday, January 1
Martin Luther King, Jr. Day: Closed Monday, January 15
Memorial Day: Closed Monday, May 28
Independence Day: Closed Wednesday, July 4
Labor Day: Closed Monday, September 3
Thanksgiving Holidays: Closed Thursday, November 22 and Friday, November 23
December Holidays: Closed Tuesday, December 25
Calder Library 2nd Floor
Calder Library 3rd Floor
Register your Cane ID at Calder Library

- Step 1: Complete application form.
- Step 2: Bring form and ID to Calder Library.
- Step 3: It will take a few days to process the registration.

Access to library resources is automatic on campus computers (UM/JMH).
- Use CaneID and password for Remote Access.
- If you have any issues, please contact Library Services at 305–243–6403.

Pick up form today or get at Calder Library later
Please complete all highlighted areas and sign the form.

*PATRON MUST READ & SIGN*

In the event that publications are not returned when due, a returned book fee will be charged against me. I agree to pay to the University of Miami all costs incurred by the University of Miami in enforcing its rights which may include additional in-house or collection agency fees.

Signature: ______________________________

**Please make PHOTOCOPY of patron's ID**

Varicella, also known as chickenpox, is a self-limited viral infection caused by varicella-zoster virus (VZV), a member of the Herpesviridae family. Prior to the clinical implementation of the varicella vaccine, more than 99% of adults aged 40 and older had evidence of previous infection. Transmission occurs via airborne respiratory droplets or direct contact with vesicular fluid. The incubation period ranges from 10-20 days.

VZV is an acute, serious viral infection when it occurs in adults. In adults, a 2- to 3-day prodrome of fever, chills, irritability, headache, and myalgia may occur. However, skin lesions are usually the initial manifestation of the disease: an acute eruption of pruritic, erythematous macules and papules that start on the face, oral mucosa, and scalp and spread to the trunk and extremities. The lesions rapidly evolve into 1- to 3-mm vesicles with clear serous fluid on an erythematous background. The hallmark of chickenpox is the presence of lesions in various stages of development. Older lesions will evolve to form pustules and serous crusts that heal within 10 days of time. Fever is variable, usually less than 38.9°C (102°F), but can be anywhere from normal to 40.6°C (105°F) in severe cases.

The most common complication is secondary infection of lesions with Staphylococcus or beta-hemolytic Streptococcus. The streptococcal infection can progress to necrotizing fascitis. Varicella pneumonia is more

2. **Parkinson's disease: recent advances.**

Katzenschlager R

**Author information**

1. Department of Neurology, Karl Landsteiner Institute for Neuroimmunological and Neurodegenerative Disorders, Donauzupital/Danube Hospital, Vienna, Austria, regina.katzenschlager@chello.at.

**Abstract**

While a curative treatment for Parkinson's disease remains elusive, our understanding of disease mechanisms as well as preclinical and pre-motor early manifestations has improved greatly over the past years. An agent with proven disease modifying properties has not yet been identified but symptomatic treatment options for affected patients have improved. For patients with motor complications, this includes invasive approaches such as deep brain stimulation and continuous device-aided drug delivery. The many facets of non-motor problems patients are faced with have finally been fully recognized and have become the target of treatment trials, as have been non-pharmacological approaches.

New Resources

BMJ Case Reports Institutional Fellowship
As of January 2017, Calder Library has an Institutional Fellowship to BMJ Case Reports allowing you to submit manuscripts without having to pay an individual fee. Please contact the Reference & Education Department at 305-243-6648 or reference@med.miami.edu for the fellowship code and visit the BMJ website to learn more about the editorial process.

NEJM Resident 360
NEJM Resident 360 is a new website and discussion platform from New England Journal of Medicine Group, gives residents the information, resources, and support they need to approach each rotation with confidence.

BoardVitals
BoardVitals is a high-quality, powerful board review tool to help prepare for board exams of over 30 medical specialties and the USMLE Step 3.

Please make sure to do the initial sign up from a networked computer and use your institutional e-mail to register. Both systems will send a validation e-mail which you need to verify to get full access.
