Information Resources for Psychology and Psychiatry

Carmen Bou-Crick, MSLS, AHIP
Librarian Assistant Professor
Department of Health Informatics
Head, Reference & Education, Calder Library
August 27, 2015
Objectives

• Upon completion of this educational activity, participants will be able to use the following resources for patient care and research:
  – Calder Library resources
  – Clinical Decision-Making Tools
  – PsycINFO
  – PubMed
  – Health and Psychosocial Instruments
  – Mental Measurements Yearbook/Tests in Print
At Calder Library...we offer you the best return on investment...$$$$

- **Databases and Online Resources** for finding the information that you need when you need it
- **Reference Librarians** to answer your questions at the **Reference Desk**: M-F; 9-5
- **Classes** to make you proficient in all resources (register online)
- **Library Access**:
  - MON-THU: 7:30 AM-Midnight
  - FRI: 7:30 AM-8:00 PM
  - SAT: 8:00 AM-8:00 PM
  - SUN: Noon -Midnight
- **Computers, Study Rooms, Quiet Areas, Recliners**...also books & journals...
- **InterLibrary Loans (ILL)**
- **Remote Access**
- **Poster Preparation** at BioMed
Use the Online Catalog to search for books and journals by Keyword, Author, Title or Subject

Search by keyword, title, author, subject, or call number
Sample search:
Keyword: clinical psychology
Sample search
Subject: clinical psychology

Clinical Psychology is not used in this library’s catalog. Psychology, Clinical is used instead.

Also, search using subheadings, making the search more specific

Chapter 13. Psychosocial Issues and Female Sexuality

Psychosocial Issues and Female Sexuality: Introduction

More than 30 years ago, psychiatrist George Engel (1977) coined a word to describe a developing paradigm for patient care, the “biopsychosocial model.” The model encouraged formulating treatments that considered the mind, body, and life of a patient as two integrating systems influenced by yet a third system—society.

Twenty years before this paradigm, Erik Erikson (1963) created a model that describes psychological maturation across the life span. Combining these two models yields a dimensional perspective helpful for the evaluation, diagnosis, and treatment of any patient (Table 13-1).

Table 13-1. Biopsychosocial Development

Not only do women use more health care services in general than men in the United States, but more women approach their physicians with psychiatric complaints, and more women have comorbid illness than men (Andreoli, 2000; Burt, 2005; Kessler, 1994). Coupled with the “almost universal recognition” that primary care is where most patients with psychiatric illness are first seen, internists and gynecologists will often be the first to evaluate a woman in psychiatric distress (Goldberg, 2003). A clinical interview such as one presented in Table 13-2 can guide assessment and includes all three domains from the biopsychosocial model.

Schizoaffective disorder

- Updated 2015 Jun 25 11:32:00 AM: monthly paliperidone palmitate may reduce relapse risk in patients with stable schizoaffective disorder (J Clin Psychiatry 2015 Mar) | Show more updates

Related Summaries:
- Schizophrenia
- Bipolar disorder
- Depression

Making the diagnosis:
- In clinical practice, use of schizoaffective disorder may solve diagnostic dilemmas associated with atypical presentation of mood symptoms within context of schizophrenia, but may not serve purposes of international diagnostic criteria (DSM-IV and ICD-10 propose different criteria regarding simultaneity and duration of psychotic and mood symptoms).
- Distinctions of classification, clinical features, course, and treatment of affective and psychotic syndromes not clearly demarcated by genetic, neuropsychological, or neurophysiological evidence.
- Alternative proposed diagnoses include:
  - Comorbidity syndrome model
  - Continuum model of psychotic and affective symptoms (rather than syndromes)
- "Psychotic disorder not otherwise specified" may be most appropriate diagnosis if insufficient information on relationship between psychotic and mood symptoms
- Stability of diagnosis poor:
  - Based on 2 retrospective studies
    - Only 36% of those initially diagnosed with schizoaffective disorder received same diagnosis at later time point
      - At 24-month follow-up
        - 42% diagnosed with schizophrenia
        - <1% diagnosed with bipolar disorder
    - Reference - Arch Gen Psychiatry 2000 Jun;57(6):593
    - In study of 61 patients, 37 (61%) later diagnosed with bipolar disorder (J Affect Disord 2005 Dec;89(1-3):201)

Differential diagnosis:
- See differential diagnosis for:
  - Schizophrenia
  - Bipolar disorder
  - Mood disorders (depression, mania)

Online Assessment Measures

For further clinical evaluation and research, the APA is offering a number of "emerging measures" in Section III of DSM-5. These patient assessment measures were developed to be administered at the initial patient interview and to monitor treatment progress, thus serving to advance the use of initial symptomatic status and patient reported outcome (PRO) information, as well as the use of "anchored" severity assessment instruments. Instructions, scoring information, and interpretation guidelines are included. Clinicians and researchers may provide APA with feedback on the instruments' usefulness in characterizing patient status and improving patient care.

- Level 1 Cross-Cutting Symptom Measures
- Level 2 Cross-Cutting Symptom Measures
- Disorder-Specific Severity Measures
- Disability Measures
- Personality Inventories
- Early Development and Home Background

These measures should be used to enhance clinical decision-making and not as the sole basis for making a clinical diagnosis. Further information on these measures can be found in DSM-5. The measures can be broadly classified into four types:

- Cross-cutting symptom measures may aid in a comprehensive mental status assessment by drawing attention to symptoms that are important across diagnoses. They are intended to help identify additional areas of inquiry that may guide treatment and prognosis. The cross-cutting measures have two levels: Level 1 questions are a brief survey of 13 domains for adult patients and 12 domains for child and adolescent patients, and Level 2 questions provide a more in-depth...

Remote access to the Louis Calder Memorial Library's **Licensed** Resources (E-journals, E-books and Databases) is restricted to faculty, staff and students at the University of Miami Miller School of Medicine / University of Miami Health System (UMMSM/UMH) and Jackson Health System (JHS) Personnel.

Eligible off-campus users (UMMSM/UMH and JHS) can access resources in a variety of ways depending on their affiliation.

**EZ-Proxy Access**
Faculty, staff and students of the University of Miami Miller School of Medicine (UMMSM / UMH) and Jackson Health System (JHS) are eligible to register with the Louis Calder Memorial Library. Once registered, the user will be issued a barcode (if you don't have one, request it from the Calder Library Circulation on the first floor. Note: it may take up to 2 business days for it to be activated). Detailed proxy login information is available here.

**Secure Gateway/VPN for UMMSM and UMH faculty/staff/students:**
Login with your MedIT issued (Outlook) username and password. After you are logged in, open a browser session and go to the library's homepage and you'll have access to the library's resources.

**Citrix for UMMSM and UMH faculty/staff/students:**
Login with your Medical Information Technology (MedIT) issued (Outlook) username and password. After you are logged in, open a browser session and go to the library's homepage and you'll have access to the library's resources. You'll also have access to your network files.

**Secure Gateway/VPN for Jackson Health System faculty/staff/students:**
Login with your JHS issued username and password. After you are logged in, open a browser session and go to the library's homepage and you'll have access to the library's resources.

**Citrix for Jackson Hospital faculty/staff/students:**
From the Domain drop-box, choose um-jmh.org. Login with your Jackson issued (Outlook) username and password. After you are logged in, open a browser session and go to the library's homepage and you'll have access to the library's resources. You'll also have access to your network files.

**Off-Campus Access FAQs**
- What are my options for off-campus access to e-journals and databases?
- I am having trouble with the Off-Campus Access Service. Where can I get help?
- Why is off-campus access limited to UMMSM/UMH students, faculty, and staff?
- Are there any restrictions?
- Will I need to re-enter my name and university ID every time I connect to a database or electronic journal?
- Why can I not get into some electronic journals without logging in?
- I cannot access UpToDate from off-campus, even though I am using the proxy server or the VPN. What's wrong?
- What can I do if I get a Cookie error message?
- Why did I get a "404 Error" (File Not Found) page or a "Server not Found or DNS Error" page?
- Why can't I view or print a PDF?
- I'm from the Coral Gables UM campus, how do I access the Calder Library online resources from home?
- I'm from the Latin American program, how do I access the Calder Library online resources from home?
Thank You
